

The waterfront function of Hollywood Shores has had an active committee this year.

We have now eliminated debris piles and established grass over most of the area. Many other miscellaneous tasks were completed including: new and improved channel markers, application of preservative to the piers, painted picnic tables, added an additional picnic table, add an information sign, add new landscaping and a flower bed, and much more. The grass been kept cut for good appearance. All of the work has kept the waterfront looking its best in many years. Thanks to all of the volunteers who have made this happen (Phil Stevens, Lanhams, Quades, Donna Diana and more) .

On top of the physical work the waterfront committee is making an aggressive effort to address the now critical problem of sedimentation in the creek entrance channel. One meeting has been held at the County engineer's office, and two DNR visits here have been made; the last one to re-survey the channel depth. The waterfront committee plans to have monthly meetings. Thanks to Jim Haley for investigating dredging and Eileen ; Lanham for researching grant and funding options. This is all in work now.

Anyone with an interest in the waterfront should consider joining the committee. Please contact Rollie Campbell (240-298-8966) or scan the QR code on the sign at the waterfront. More information and codes can be expected in the future.

And PLEASE all contribute to keeping the waterfront clean and tidy and help to stop any irresponsible activity.
